I'm an Interactive Designer, Front-End Developer, and Creative Technologist with 20+ years of experience designing and building interactive digital experiences for global brands including L'Oréal (Kiehl's), Elizabeth Arden, Armani Exchange, and Hearst Communications.

I combine visual design, front-end development, and motion to create engaging digital experiences from early concepts and rapid prototypes through production-ready implementation. I enjoy working at the intersection of design and development to help turn creative ideas into polished digital experiences.

Portfolio highlights include campaign websites, motion-driven web experiences, interactive concepts, and creative front-end development.

CORE SKILLS & DISCIPLINES
